

RETROFIT YOUR SR INSTALLED BASE

8 Series relays are designed to **fit existing SR cut outs**, streamlining retrofits & reducing downtime.

Rely on GE Vernova's **Life Cycle Management Services** and OEM expertise to retrofit your installed base.

LIFE CYCLE MANAGEMENT SERVICES (LCM)

Whether you need to modernize equipment, address obsolescence, or develop a long-term support strategy, we deliver practical solutions.

RETROFIT KITS

- Reducing commissioning time and costs
- Simplify replacement with 8 Series equivalent
 - Without drawing changes, system rewiring, or test block replacements

RETROFIT SERVICES

- Reduce risks associated with aging assets
- Improve supportability with targeted obsolescence management
- Enhance functionality

CUSTOMIZED LCM PLANS

- Modernize strategically, aligning investment decisions with your priorities and budget
- Provide insight to prioritize investments based on asset obsolescence, condition, & risk
- Deliver retrofit and training services roadmap

8 SERIES

EASE OF USE

- Draw-out design for **simplified testing, commissioning, and maintenance**
- Common hardware & software platform for **improved learning curves & mastery**

TECHNOLOGY & INNOVATION

- **Avoid unplanned downtime** with predictive maintenance leveraging built-in monitoring & diagnostics
- **Reduce maintenance effort and cost** with field swappable power supplies
- **Detect faults faster**, operate safer, & improve system reliability with faster scan rates
