Enervista Configuration Software – D485

Revision 1.0.3 Release Notes

GE Publication Number: GER-4357

Copyright © 2009 GE Multilin

Overview

Summary

GE Multilin issues the Enervista Configuration Software version 1.03 for D485 release that introduces the following to the D485 Configuration Software:

- Eliminates Warning Screen when connecting to and configuring D485 devices using the software

- Released November 18, 2009

Release details

In the following enhancement descriptions, a revision category letter is placed to the left of the description. Refer to the Appendix at the end of this document for a description of the categories displayed.

Enhancements

E

Removed Extra Warning Screen when connecting to and configuring D485 devices using the software

The Configuration Software has been modified to remove a warning to the user that states the setup software being used is out of date. This warning is inaccurate and has been removed.

Appendix

Change categories

This document uses the following categories to classify the changes.

Table 1: Revision categories

Code	Category	Comments
N	New feature	A separate feature added to the relay. Changes to existing features even if they significantly expand the functionality are not in this category
G	Change	A neutral change that does not bring any new value and is not correcting any known problem
E	Enhancement	Modification of an existing feature bringing extra value to the application
D	Changed, incomplete or false faceplate indications	Changes to, or problems with text messages, LEDs and user pushbuttons
R	Changed, incomplete or false relay records	Changes to, or problems with relay records (oscillography, demand, fault reports, etc.)
C	Protocols and communications	Changes to, or problems with protocols or communication features
M	Metering	Metering out of specification or other metering problems
P	Protection out of specification	Protection operates correctly but does not meet published specifications (example: delayed trip)
U	Unavailability of protection	Protection not available in a self-demonstrating way so that corrective actions could be taken immediately
H	Hidden failure to trip	Protection may not operate when it should
F	False trip	Protection may operate when it should not
B	Unexpected restart	Relay restarts unexpectedly

The revision category letter is placed to the left of the change description.
